4th April 2011

To whom it may concern

The CFS Group of Companies have been involved in Construction in Ireland over the past 40 years. Our main scope of works has been in the heavy side of Construction re Formwork and Precast. In the last 10 years we were also involved in developing our own Sites which were very successful. A big advantage to us was the back up of our own Formwork and Precast Companies.

Due to this increased workload we needed to Partner up with an experienced and diverse Labour Supply Company. We found that in Speedway Construction.

Speedway Construction came to work with our group of Companies over 10 years ago with great enthusiasm and knowledge of the Construction Sector that we instantly recognised the advantage of having them on board.

They expanded their Services to our Companies to include for Crane Operators and Crane Coordinators down to the Carpenters, Steel Fixers and the Concrete Placing Operatives that were required.

In recent years they have supplied us with the factory Staff required to work in our Precast Plants which proved very successful in which we were able to maintain a high level of output.

We found that their level of diversity and attention to detail far out weighted their Competitors which has been proven in our commitment to them.

I therefore have no hesitation in recommending Speedway Construction for any Services in the Construction Sector that they are Tendering for and would be happy to provide any further information on request.

Yours Sincerely

Tim McNulty
Managing Director
